Message from General Chairs

We are pleased to welcome attendees to visit the city Delft, the Netherlands and the TU Delft campus. We appreciate the organizing team and all related people who helped bring together IEEE EuroS&P in this year. It is exciting to organize the 2023 edition of EuroS&P at building ECHO, TU Delft, from July 3 to July 7, where researchers and stakeholders can meet physically.

Following the successful tradition of previous editions, IEEE EuroS&P 2023 brings a solid technical program, put together by the Technical Program Committee led by David Evans and Herbert Bos. We thank them and all TPC members for their excellent works and contributions. The main conference (July 4-6) is organized with 11 affiliated workshops (July 3 and 7) concerning emerging and hot topics in Security and Privacy. We gratefully thank our workshop chairs, Giovanni Apruzzese and Fabio Pierazzi, for the organization and workshop proposal selection, and to all the workshop organizers for their precious work.

Organizing IEEE EuroS&P 2023 requires efforts in terms of both workforce and funding. We thank all the volunteers who joined the team for this aim. Our thanks go to the IEEE EuroS&P Steering Committee for guiding the conference to its current well-respected status. We also thank Giancarlo Pellegrino for supporting the organizing process. Furthermore, we warmly thank our Financial Chair, Stjepan Picek, for managing all the financial aspects. We would like to thank the organizing committee members and all staff members who tirelessly worked to make this event possible.

Among them, Luca Verderame and Stefanie Roos, the Publications Chairs, who organized the collection of the final papers to ensure the in-time production of the proceedings, Savvas Zannettou, the Publicity Chair, for the help in publicizing the conference through a variety of channels, Giovane Moura, the Sponsorship Chair, for helping in searching and selecting sponsors for the event, Roland Kromes, the Web Chair for the management of the website and the conference information therein, Luca Mariot, the Poster Chair, for managing the submission and selection of posters, and Vera Rimmer and Azqa Nadeem, the Mentoring Chairs, for the coordination and mentoring for attendees. Last but not least, we are grateful to the secretaries, event team, PhD. students and PostDocs from TU Delft for their local support through all the days of the conference.

Kaitai Liang and Georgios Smaragdakis
