Propositions

Accompanying the thesis

Design for Sanitation

How does design influence train toilet hygiene?

by

Marian Loth

1. Design positively influences hygiene by reducing Physical, Mental and Social distances between users, toilet, dirt and people (this thesis).
2. Standing urination in a standard train toilet is impossible without spillage (this thesis).
3. People basically do not want to use a train toilet (this thesis).
4. The train is a society on rails.
5. Everything has a rhythm (Frizzle Sizzle).
6. For a smooth doctoral journey, write your dissertation in the toilet.
7. The academic environment keeps toilet-related research at arm's length.
8. Milk comes from a cow and not from a milk bottle.
9. People are reluctant to change.
10. Emancipation will be complete when women and trans-people use urinals.

These propositions are regarded as opposable and defensible, and have been approved as such by the promoter Prof.ir. D.J. van Eijk and copromoter Dr.ir. J.F.M Molenbroek.
